

Lower the cost of serving smallholder & emerging farmers.

For lenders, MFIs, insurers & co-operatives

Most farmers are "thin-file": no structured records, making credit assessment slow, costly and risky. MaintainFlow Ag gets farmers logging their daily crop & livestock activity — and turns it into **verifiable records and a credit-readiness score** your team can act on.

Offline

Works on cheap phones, no signal needed

Whole-farm

Crops, livestock, costs & equipment

Lender-ready

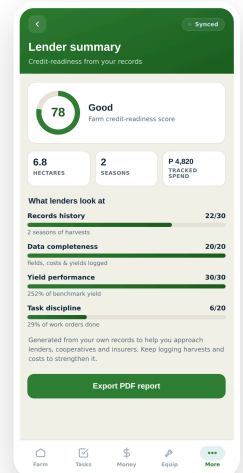

Structured records + PDF report

WHAT YOU GET

- **Verifiable farm records** — fields, herds, inputs, costs & yields over time
- **Credit-readiness score** & exportable PDF summary per farmer
- **Lower assessment cost** and faster, better-informed decisions
- **A warm channel** to active farmers at planning & purchase moments
- **Impact & portfolio insight** from consented, structured data

WHY FARMERS USE IT

- Free to start & genuinely useful day one
- Saves money — clear costs, fewer losses, timely treatments
- Their data, their consent — they choose what to share

HOW IT WORKS

1

Farmers log

Daily crop & livestock activity, costs and yields — offline.

2

App structures it

Records become a credit-readiness score & standard report.

3

You decide faster

Assess, lend or insure with real data — at lower cost.

Let's run a pilot.

We'll co-design the report your team needs and onboard a first cohort of farmers. Sponsored-Pro & bulk distribution models available.
